

ROSA POLYMER

TYREF ROSA POLYMER

Varnishing plate for offset coating.

Available in thickness:

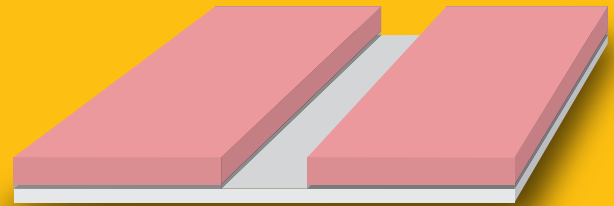

- 1.15mm (0.045")
- 1.35mm (0,053")

Available widths:

- 1080mm (42^{1/2}")
- 1320mm (52")
- 1480mm (58^{1/4}")
- 1580mm (62^{1/4}")

Using the latest available polymer materials and production techniques, Tyref has developed a polymer plate of the highest quality.

The special surface and solvent resistant construction gives a dual purpose product suitable for long run WATER BASED (AQUEOUS) and UV coating applications.

Surface	Polymer blend
Thickness	1.15mm; 1.35mm - 0.045"; 0.053"
Relief depth	0.80mm; 1.00mm - 0.031"; 0.040"
Hardness	68° Shore A
Colour	Pink
Application	Water based and UV coating

PRODUCT FEATURES

- Suitable for UV and water based (aqueous) coating applications
- Abrasive resistant surface
- Solvent resistant construction
- Excellent coating lay and transfer
- Superior sheet release
- No ink build up characteristics
- Durable, long life
- Consistent guage tolerance
- Easy, consistent cutting and peeling
- Suitable for cutting manually or by plotter
