

AQUA PLUS COMPRESSIBLE POLYESTER BACKED

TYREF ECO PREMIUM AQUA PLUS COMPRESSIBLE POLYESTER BACKED

Varnishing plate for offset coating.

Available in thickness:

- 1.96mm (0.077")

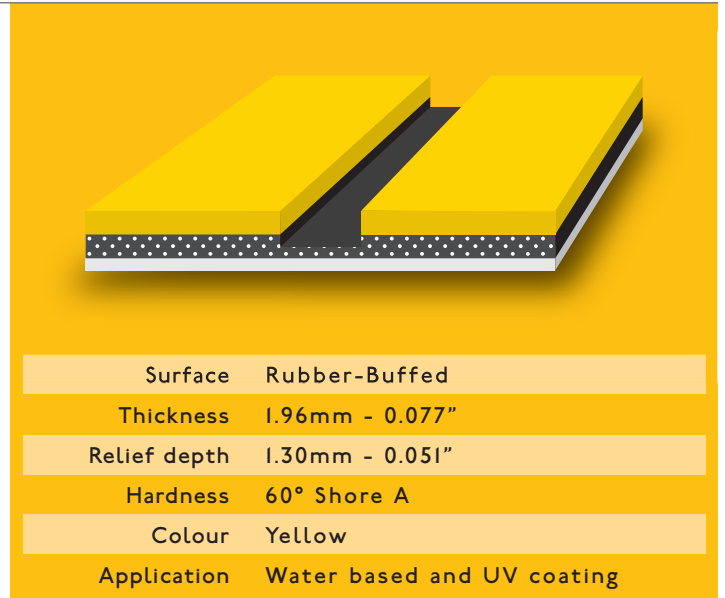

Available widths:

- 1080mm (42^{1/2}")
- 1280mm (52")
- 1480mm (58^{1/4}")
- 1580mm (62^{1/4}")

This unique product is truly dual purpose and is suitable for both UV and WATER BASED (AQUEOUS) coating applications.

The smooth surface compound has been specially developed to give high levels of gloss and excellent sheet release in both applications.

As with all of our Aqua Plus range of products, the surface compound has been developed to completely eliminate ink build up in the WATER BASED (AQUEOUS) coating application.

Since the Blanket's structure has no fabric, any problems related to "fabric impression" are completely eliminated; therefore it also limits the gauge reduction and prevents coating and cleaning agents from penetrating into the blanket. After cutting, the blanket shows no fibres on the cut edge.

The special blanket construction has a thick strippable compressible layer between the Polyester and surface layers giving superior smash resistance and maximises the relief depth to 1.30 mm (0.051").
